THE MANCHURIAN GOLD MINES.

The Hu-pao says :- There are gold mines in Manchuria which may give a better account of themselves then any of our coal or iron mines. Some of the latter, as for instance the Chibchow mines of Anhai, and the Su-chow mines of Kiangau, have so far been anything but a success, owing to difficulties of tiansporting the mineral to the places where it is required. But for gold there is a good market everywhere, and all that is brought out of the earth is sold immediately and on the spot. What has stood is want of method. The Ping-tu gold mines in the Cornish style, and he threw his man by a houses were filled with goods to overflowing on R. Dairy Farm in the way of successful gold-mining in Chica. on the Bhantung Promontory employ about Tis. 800 a day; but the output daily is only 3 sion was disputed. The men then played in their largest sources of income was undoubtedly Hongkong Ice... the existence of a very different state of thines duest and the best contested ever seen in the by but in the last three months the freights H. Steam Laundry... at the Amur gold mines. . When Profectal assumed the direction six months ago, the working of these mives was commenced with sudden and wonderful energy, and a subsidiary mine was opened at K'i-kan Ho. Here where the gold brigands had worked at their forbidden mines can will be the winner of the match. before they were so disastrously scattered by GETHING UP THE HANKOW RIOT the Chinese G vernment troops, gold mining is now actively proceeding under the sanction and Jack Wanno; the champion, was resumed maintaining its normal, export, because in and encoungement of the Government. At at I lymouth to night, Wannop was in better governd of those articles which their ships con-The trouble began on Thursday afternoon, first the output was very small, but it has form and made the play for the first twenty reyed—he referred particularly, for example, to Charge troops, probably born of his ex. necessary application, the paper adds, has been had been informed that trouble was a-browing, of the third moon (20-29th April 1889) the joint acting on the defensive. With re-ard ed. If the directors considered it necessary to kept busy proving in the newspapers that the lieved that they had already established them. to the competition that had to be contunded

the vessels would prove highly estisfactory to to the proprietors. Referring to the mail contracts, he said the only observation he had to make was that their Italian mai contract

between Venice. Ancone. Brindisi, and Alexandrie had been renewed for a period of another year. For this service the Italian Government paid them a sum of £30,000 a year, which they did not consider by any means too highly remunerative. Their relations, however, with the talian Government, had always been highly atisfactory. At the same time if, as, was postible, when the Italian Government next year passed under review the whole of the subsidies which it granted to ma itime services and their connection with the Italian Government should crass, while they would repret that such was the case, so far as the influence on the profit and loss secount of the company was concerned it would not matter much whether the service was coninued or whether it was finally abandon-d With regard to the financial position of the company he thought on the whole it would be satisfactory to the proprietors. But, as he had frequently pointed out, the revenue of the company was subjected to fluctuations, of which they had had ample experience in the past. As an illustration of what he meant, he had to go ack no further than 18.7. In that year their riffic, that was to say their rescipts from traight and passage, money were £300.000 less than they were in the year 183 or two years previously. This was equal to a difference of 7 per cent dividend to the shareholders. By the xercise of that care and forethought with which he claimed that their affairs were administered the large deficiency of £:00,000 made only a difference of 2 per cent, in the dividend haid to the proprietors instead of 7 per cent.

Hear, hear.) Last year their traffic returns b. gan to improve, and he was pleased to record a still further and greater improvement in the raffic returns for the first six months of the present year. Taking the six months of the present year as a basis of calculation for the whole year, they had not only made up the leficit of \$200,000 which they had lost in 1887, but they had done still better. Their traffic returns, if they were maintained at the same ratio through the remaining portion of his year, would be at the rate of £800,000 per munm better than the returns of 1807. (Apdanse). This was no doubt in some respect one of the most satisfactory statements that had ver fallen to his lot to make. They might naturall, conclude under these circumstances hat there was nothing fo them whatever to do now except to sat, drink, and be merry. (Laughter.) Unfortunately there was always a skeleton, and he was sorry to say that the skeleton in this case came in a triple form. In the firs place they had in full operation this year, the reduction in their mail subsidies which amounted to no less than 295,000. Then they would have to comiend with an advance in the price of cold and the third head of this spectre was that the freights, which had belied to swell their exch quer so much during the past months appeared for the time being, at a for £100 and the wrestling championship of the events, to have left the high water mark at which it stood at last year. For example, in The articles stipulated the best two of three October, November and December of last year their steamers leaving the Port of London were filled with cargo to overflowing at the rate of 80s. a ton : at the present moment their rates

were 40s. and 60s. a ton for a smaller cargo and yet at this great reduction they were by no means obtaining such full cargoes at the time Wannon won the toss and selected the Cum- he referred to. NEWS FOR THE FRENCH MAIL.

THE PROPOSED STOCK EXCHANGE. Prior to the year 1788 the stock jobbers

and brokers of London, like those of Hong. kong at the present day, possessed, no regular exchange. For some years Change Alley had been the recognised meeting place, but it was not until 1730 that a room was hired for the purposes of a Stock Exchange. The inconveniences of irregular sasen bingles in the street, which led to the institution of the London Sock Exchange, has given rise to a similar movement in Hongkong. Stock Exchanges in the various considerable towns of England, Sentland, and Ireland 10 years:are juitations of the Landon organizations. and the Hougkong one will no doubt follow on the same lines. Its establishment uppears to be considered by many persons as a sufficient remedy for the evil of share gambling in its virious phases from which the colony has suffered during the last few years and into the meer working of which an insight was afforded by the case he rd last week in the Supreme Court, A Stock Exchange is, however, a purely wolunter. Besociation, and its intes are binding only a between the members themselves. In the City of Landon a stock broker has to obtain but a much larger number of deaths. a licence from the Lord Mayor and Aldermen, for which an annual fee of £5 has to be paid. Eigewhere in England brokers in not require any licence, Membership of the Stock Exchange, whether in London or in other towns possessing such institutions, is a privilege which cannot be claimed by say one as a right and which confers no legal status on the holder. The organisation offers conveniences, for the transaction of business and maintains a standard of what is deemed correct professional conduct, but it has no control over any but its members, and the outside broker may conduct his business as he ares fit. An applicant for admission to the London Stock Exchange, unless already clerk in the Exchange, must be recommended by three members of at least four years. standing, each of whom becomes security to the extent of 2500 that the claims of the applicant's creditors shall be met should be become a defaulter within four years after his admission. If the applicant has been a clerk in the Stock Exchange for a certain time the security required on his becoming a member smaller. A member must not be a partner of any person who is not a member of the Stuck Exchange, and as a firm is not admitted to membership collectively, such partner. must be a member on his own separated has arrived from England and given much satisqualifications. A person who has been binkrupt, wishing to become a member. must show that he has fulfilled the condi- sections of Mr. Watson, the assistant apothecary, smoker of one mace daily. tions of his deed of composition, or his paid at least 6: 81, in the pound and procured his official discharge two years previously, The entrance fee is, for clerks of four vears, standing, 75 vuiness; for all others who are admitted, 150 guineas; and the annual subscription for all members alike in 21 guiness. The election rests solely with the Committee, and any member may be expelled or anspended by a vote of three-fourths of the Committee at a special meeting. Disputes between members as in the performance of contracts must be settled by the Committee, as it is contrary to the rules for a member to respect to found proceedings to compel another member to perform a contract, and if he does so it is at the risk of expulsion. Some of the rules apply more portioni rivito jobbers than to brokers. In Hongkong there are as vet no professional jobbers, but with a regularly

-make their appearance. established some improvement in the conduct of share business may reasonably be looked for. There will be a recognised body to decide daubtful points and in sauction or condemn particular forms of doing busi- them. ness. The rules of the Exchange, however, will only hold good as amongst the members | cholesaic type and 13 deaths. themselves, and the outside bo kers, if any remain outside, will continue to de their business seconding to their own lights. But even if all the brokers were gutffered into the new institution the gambling which new goes on will still continue unless legis. lation is introduced to put a stop to it. Priva e paying Procle will-mill buy and sell on time, and Proceed as merrily an eyes. There might perhaps be a little more difficulty in obtaining currency for fancy quotamons than ! was the case in the tecent " home " corner, diseases admitted to lipspiral. These tables because when a marke "marks," a price to have been re-arranged by the Superintendent and the Stock Exchange be has to bood in write in a very much better form than those given in porary buildings, the cause of this being that ten particulars of the transaction, and, if previous reports, being more systematic and con- the new hospital as been given over to the Enrequired, he must give the name of the other party to the transaction in order that the correctness of the quotation oray be tested.

constituted exchange they would probably

discourage gambling. The only way in which this could be done would be by a law the last ten years are as follow :of the colony making it compulsory in all time bargains to give the registered numbers of the thurse to which each particular transaction refers. And the efficier of a inw of this kind even may be reported with some doubt, for gambling is notoriously

hard to scotch, and some means of betting on the rise and fall of shares would probably will be found. The imposition of a licence for brokers would have a good effect. both as adding to the revenue and as tending to dimirish the growth of class which however useful within certain limits, bas shown a tembercy of lite to increase beyond the legitimate requirements reasons I will give later on. of the colony, and a large section of which depends for its income on gambling purp and simple. Before any action is taken, however, either as to time bargame or the imposition of a licence fee, it would be prudent

THE MARINBURK FURNITURE COMPANY, LIMITED.

The statutory meeting of the above Company was held at the office of Mesers. Reuter, Brookel manie & Co. on the 15th instant. There were present esers. H. Heyn (Chairman). F. Dod well, R. C. Wicox, G. R. Stevens (Directors) J. Marinburk (Manager) F. Rapp, and A. E.

The CHAIRMAN said-Gentlemen, this is the statu ory meeting of the Company, called in accordance with the Ordinance of 1:65. The shares have all been subscribed for, and allotted There is no business to transact, but should any question be put by a shareholder I shall be glad

THE REPORT OF THE COLONIAL SURGEON.

The following report of the Colonial Surgeon for 1 88, is published in the Gazette for general information :--Government Civil Fospital.

Hougkong, 8th May, 1889 Sin .- I have the honour to forward my auanal report for the year 1858 together with the tables showing the work done in the Medical Department under my supervision, the report of the Superlutendent of the Government Civil Hospital and that of the Government Analyst.

The admissions to the Hospital from the Police Force show a considerable increase, which more apparent than real, the fact being that the force has been increased in strength by nearly fifty men. The increase has been among the

decrease of two. bles that the voluntary examination of the women is doing a prest deal of good. We have much to be thankful for that they have shown so much sense, and it speaks well for the way the examinations are conducted in this Colony that they have caused no offence to the women.

HELLTH OF THE COLONY.

Table XVI, shews the rate of mortality among t the European and American community Horgiong for the last ten iyears from all classes of disease The number and percentage has stood on the returns at 3. 40 for eight years, I doubt if the perce tages given of late years can be considered correct.

I give below for the fifteen years I have been Provincial authorities. in the Colony the mortality among the Europeans ease that may be attributed among other causes to diarrhosa has been prevalent insanitary houses, filth poison, and overcrowding. In these tables I have put down under the heads of Cholera Nos ras, Cholera Sporadio, Choleraic some ocular delusion she imagined having seen I larrhos, names given to the cholers common to her deified in a temple. Europe in the summer months as distinguished from what is known as Asistic or Epidemic Cho- complaint against a man who advanced lera. Lust summer there was a con-iderab e outbreak of this form of disease, but there was nothing about it of the nature of an epidemio; soli tary cases occurred all over the bity, no partieular quarter being distinguished as suffering more than another. Most of the cases occurred in faithless to him. A oral, says the paper, don't the months of Jone and July; when unripe stone fruits are imported and cat a in the colony in large quantities . In all the cases I saw all the patients complained of griping pains in the bowels, and in all the post m riems I was present, and the stomach and bowels were extremely congested and inflamed. In the Asiania form of cholera he handled it, it went off and killed the buyer. gripes are abs.nt, the only pain bing from His relatives are claiming a compensation to the cramps chiefly in the lower extremities, the amount of \$100. vomiting and purging being quite sin ess. The bowels do not show any inflammation; these symptoms being nearly the only difference between the two diseases except that the mortality in one is less than that of the other. The experiones of the outereak in the Gael. I think, is quite sufficient to show that this outbreak was These figures show a considerable decrease in | not of an epidemic character, for with the overin the cells at night an epidemic form of this disease would not have stopped at sixteen cases. No European in the Gaol was attacked and Table IX. shews the number of prisoners ad- istopping the drinking of cold water (which the

DEATHS AMONG CLINESE.

The outh eak of smal-pox in the beginning of the year also contributed argely to the mortality in the foreign part of the community, 29 died. this cause. There has not been time to test the pravious experience has shewn that every third year there has teen a slight outbreak of this disease, but never before one so large as this year. Small-pox generally ap ears in the winter months beginning about November. Previous experience has shown that one winter we have had no cases or at most half a dozen, the next winter there has been a dozen or two, and the thi d winter fifty or sixty; this has been the rule during my experience of the Colony. This winter there has been only one case recorded

among the Chinese and six or seven mild cases of varioloid among Euro cans. -These outbreaks have brought much discus sion over the long pending scheme of a Hospita for Infactions diseases. Some three years ogo a commission was formed of the Military and Naval Surgeons, the Military Engineers, the Surveyor General, and myself, and after long disonssion it was agreed that the best and only suitable form of Hospital for Infectious Diseases in this Colony was a Hulk, and to that opinion I still adhere. There is no site in the Colony to which there are no strong object ous on one or more scores and most of hese o jections are removed when a bulk comes in question. There must be a receiving ward ashore where cases one receive immediate attention and be diagnosed. Four years ugo four cases were brought in by the Police and sout into the Cholera Ward. I was notified and harried down at once much disguared to find one drunken man, one case of colic, and two case of high fever, all of whom had been found "vomiting and purging." which of course proved that they were cases of Cholera. Atthat time there was a considerable seare and any one 'vomiting or parging." no matter from what cause, got a dose of Cholera mixture served out to him by his nearest friend or neighbour who could precure it from the nearest Police : tation: This sort of thing shews the absolute necessity for a word of observation and there is no place better than the present

Civil Hospital when it has received some necessary improvements. Dr. Atkinson bas furnis ed a very interesting report and also notes of some interesting ases. He has a so given some valuable recommondations. He has had yery hard and much annoying work, but as assistance is coming out in the shupe of another Surgeon and his Su bordigate ctaff is in a fair way now to be as near perfect as possible I hope it will never occur

Mr. | row furnishes an Analytical report some of which will in erest the Public; the report on the milk supplied by the Dairy Farm is a very hand-one gratuitous advertisement to an Establishment that is certainly a very great benefit to the Colony -I have the honour to be, Bir, your obedient Servant.
